

**Amendments to the Specification**

Please replace the paragraph beginning on page 10, line 27 with the following amended paragraph:

The compositions of the invention can be made: negatively buoyant (having a specific gravity that is greater than that of CSF), neutrally buoyant (having a specific gravity that is about equal to CSF), or positively buoyant (having a specific gravity that is less than that of CSF). The specific gravity (SG) of CSF is normally about 1.0063 ~~gm/ml~~ to about 1.0075 ~~gm/ml~~, although those skilled in the art will recognize that the specific gravity of CSF may vary individually between subjects.
